RAMA KEN

WHAT DO I DO?

Code

I mainly program in CSS and Javascript technologies for front end development. I also do back-end development in php and mysql.

Design

Most of my designs are minimalistic. I believe simplicity and clarity brings comfort. I design website prototypes in photoshop and illustrator.I animate designs in after effects.

Teach

I teach online and face to face . My online tutorials have reached over 30,000 people as you currently read this. I also tutor people on web technologies and mentor them on which steps to follow in the web development sector.

Video editing

I have been awarded for my video editing skills in Samsung and LG. I edit my videos using premiere-pro and after effects. I do my audio production in adobe audition and sometimes in audicity.

TOOLS I USE

- Sublime
- Photoshop
- Premiere-Pro
- Power-Point
- Brackets
- Illustrator
- Blender
- FileZilla
- After Effects
- Canva
- Chrome Tools
- Adobe audition
- Prezi

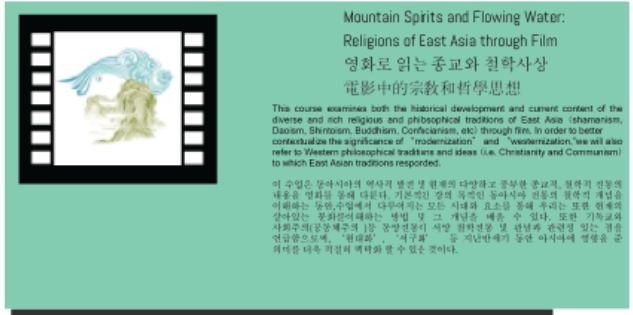
Jocelyn Clark

Problem

I was approached by Jocelyn Clark who is a professor in Pai Chai University to build a website, a video and a brochure to advertise her classes to her students in Pai Chai.

JOCELYN

http://jocelynclark.com/paichai.html



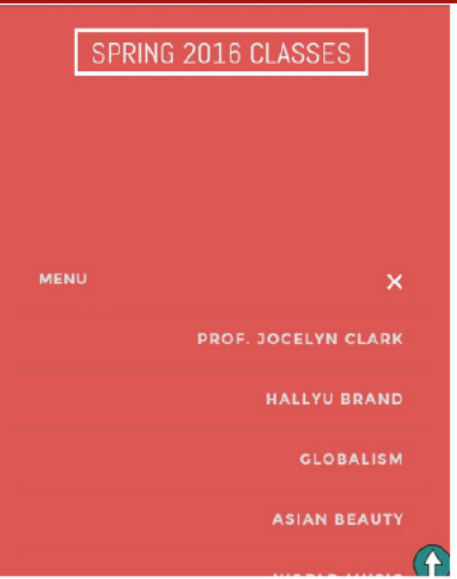
I received a list of the classes and the relevant information about the classes which included class title and a description of the classes which was in English and Korean.

I made a wireframe in illustrator to show all the information in form of a website. I divided all the classes into sections and assigned each class a design using colors to differentiate the content.

I used Abel font for the main titles and simple san serif font for the description since the language in the description consisted of the many languages and simple san serif suited this languages.

I added two more sections to the webpage one to describe the professor and another to have a video which will be used to showcase the classes.

JOCELYN



I turned my design into a picture and started the process of coding.

I selected skeleton as a framework to build my grid for my webpage since it is not heavy and does not have javascript components compared to other frameworks in the industry.

Skeleton framework allowed me to build a fluid system and make the site to be suitable for all screen sizes.

After setting up the grids I did some css coding for the site and also media queries to ensure the mobile experience was efficient.

I built a mobile menu for the site using javascript to ensure the menu is accessed and viewed differently from a mobile view.

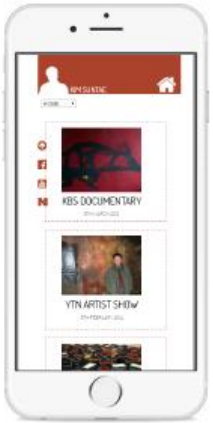
I placed an arrow at the right edge to ensure easy navigation for the user when he needs to go back to the menus.
.

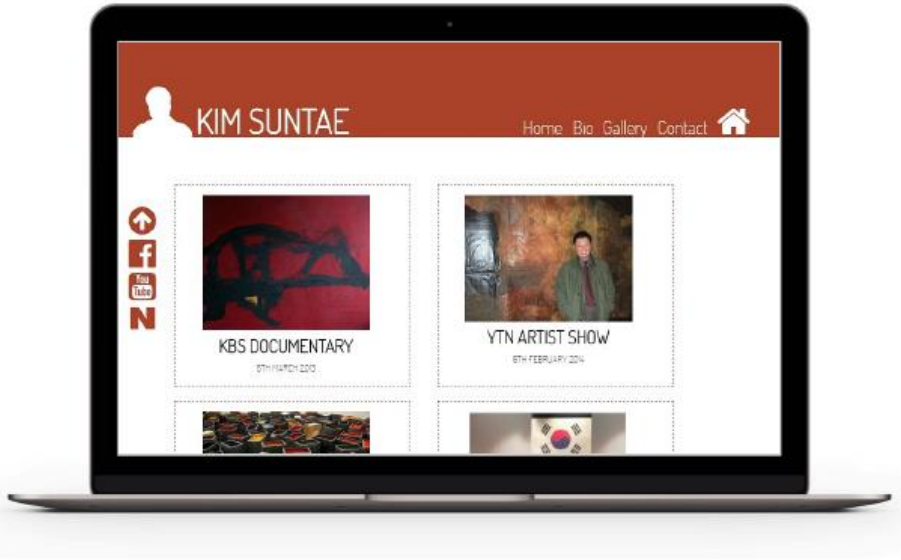
JOCELYN

SUMMARY

The client received a one page website which she used to share her classes online. She also had a bonus video to present her classes so that it can easy to digest the information for people who do not have a lot of time to read through everything. I also made an extra poster to place on the school noticeboard so that students can be directed to the site.

Kim Suntae



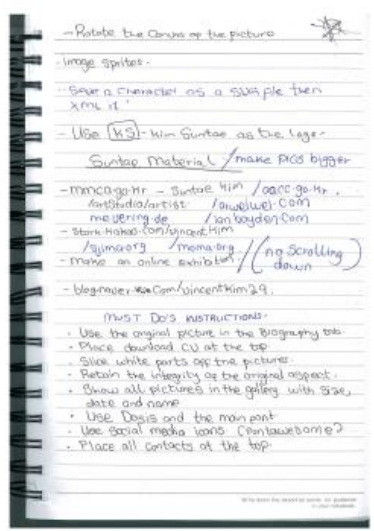


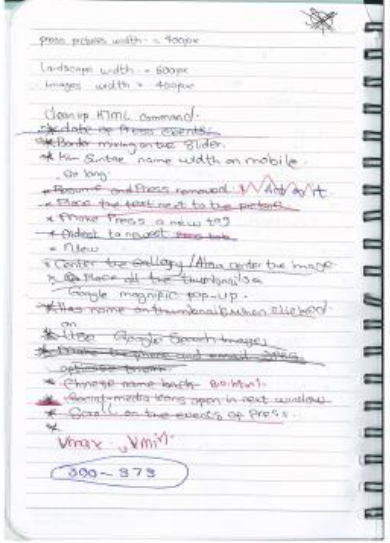
Kim Suntae is one of Korea best painter and wanted to have his content have an online presence. He was having an exhibition at the Daejon National Museum . He needed a website to present his biography information and also his press release.

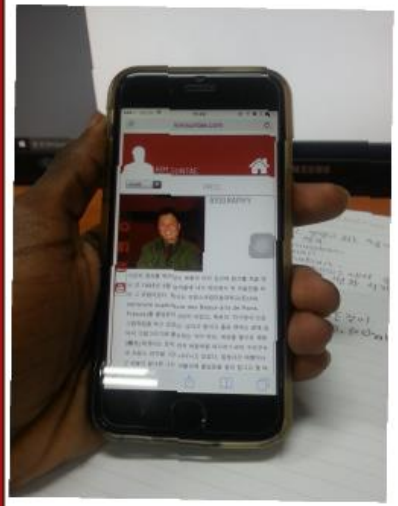
PROCESS

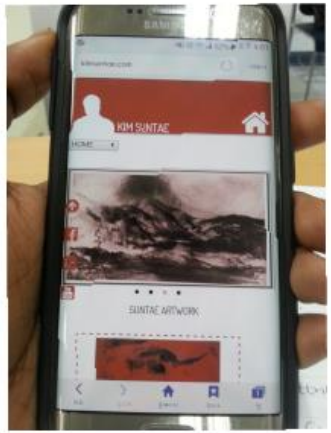
http://kimsuntae.com/

-Met up with the client to talk about the product and he mentioned a few revisions
which needed adjustment.
-Optimized all of the pictures in adobe photoshop to make them load faster when uploaded to the web.This changed the resolution of the pictures reducing loading time.
-Built a responsive grid system from scratch without using any frameworks.
-Used css media queries to make the ultimate mobile web experience.









-Built a responsive grid system from scratch without using any frameworks.
-Used css media queries to make the ultimate mobile web experience.
-Made a photo gallery effect using j-query . The photo gallery offered the following functionality.

Pagination to view many pictures , on each page there were 21 pictures.

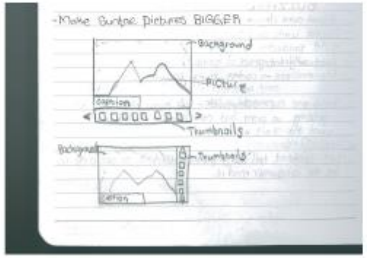
Slideshow effect which allowed an automatic slideshow when clicked.

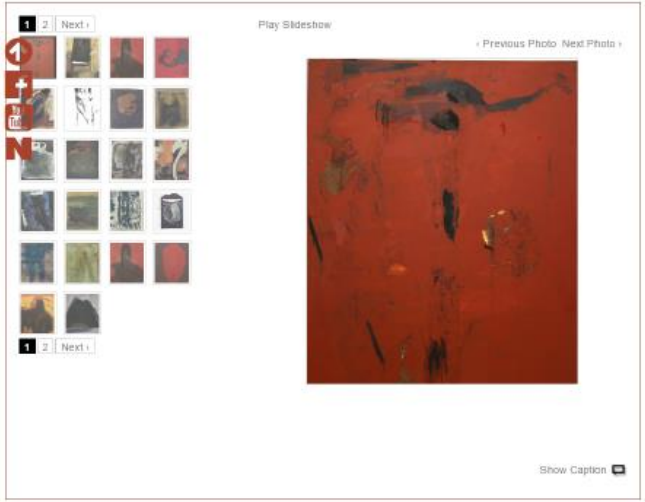
The caption for the pictures could be seen using a toggle function which could also hide the caption.

Placed two buttons at the top to view the next and the previous photo.

A download functionality to download the original pictures if they are needed for a certain publication or design.

-Made a lightbox effect on the mobile view and added a photo-swipe effect using j-query.
-Used font-awesome css tool-kit to design the social media icons.





Summary

Mr Kim received a platform where you can view his work , his history and a place to showcase his work.

Visited the exhibition at the Daejon Museum and witnessed the showcasing of the products.

PARADISE

The main purpose was to make a one page site which was visually appealing and could be used to teach students the elements and functionalities in bootstrap framework

PARADISE

PLACES

Ham hock burgdoggen pork, ball tip pastrami t-bone corned beef andouille. Cupim swine sirloin spare ribs pastrami chicken capicola leberkas. Pork chop chuck beef ribs kevin landjaeger jowl. Turkey pork belly beef ribs tenderloin short loin fatback. Ball tip ground round salami pancetta brisket beef ribs. Salami filet mignon andouille alcatra hamburger tail.

I placed the title and the content of the places to the same height to lay side by side.
I placed 6 different pictures and sized them to the same height and created a uniform feeling for the site.

PARADISE

I let the activities page break the grid by bringing it up more than usual.
I illustrated six icons which showed the activities that were taking place in the area.

PARADISE

Summary

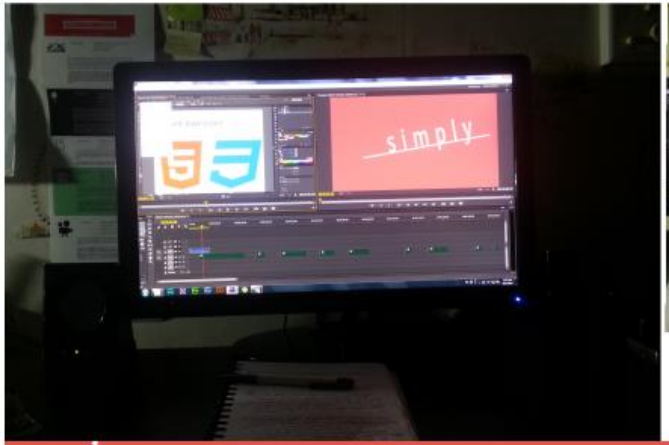
The main purpose of this site is to use it to teach bootstrap in the simply channel. Production of the videos is still in process. Bootstrap has a lot of functionalities and we will cover some of the functionalities offered by this popular framework.

SIMPLY

https://www.youtube.com/c/simplyeleza

Simply is a platform developed by me to teach web programming to anyone who has access to internet. I provide free exercise materials which are stored in google drive. The channel has received a total of 51,807 views as we speak right now. I teach people what I have learnt using video in the simplest way I can.

SIMPLY



One of the Key activities in making a simply tutorial is writing a script for the video and then check its errors.
I use adobe audition for audio production.
In the case of animation i make illustrations in illustrator and animate contents i after effects.
After the video is produced i make thumbnails of the videos and make them have the brand look.
I do research on SEO and find necessary keywords .

Summary
Simply is a continuous process and i will like to collaborate with anyone who makes good content to teach web programming.

PHAN THIET MEMORIAL PARK

Home Pre-sale Obituary History Contact

Who are we?

Turkey pastrami turducken rump. Venison fatback bacon tongue cow burgdoggen corned beef shank brisket boudin bresaola swine. Andouille shoulder pork turducken. Ball tip turducken picanha rump landjaeger spare ribs. Sirloin ham cupim rump leberkas kielbasa fatback doner.

Why Phan Thiet Memorial Park?

These are the reasons why you should pick us as a good destination for you.I swear there is a problem with the clipboard in this illustrator version and it is working me out while I am trying to design something good. I hope no one will give me a fuss about it in the adobe programming team.
